

PVC & PP

Tailor made
innovative
designs...

An increasingly prolific growth area is in tambour doors for caravans and boats. Their light weight and flexible nature makes Waivis tambour doors ideal for this type of application. Driven largely by the need to maximise on space, designers are calling on Waivis to produce an array of both horizontal & vertical tambours for applications such as TV cabinets, appliance housing and even shower doors.

With a wide spectrum of finishes to choose from, matching an existing interior design or using different finishes to differentiate between living, kitchen & bathroom areas is straight forward.

Our units have become increasingly popular amongst VW van converters where space really is of a premium. The tambour shutters can be made entirely to your spec, in a wide range of colours and decors. Our customers also have the option of having their own designs printed on them!
