

### GLASS TAMBOUR High-end Kitchen Design

### Tailor made innovative designs...

Supplied to us by REHAU, this real glass tambour unit offers a unique yet functional design feature for any kitchen. It has been designed with a wider 50mm slat to create a truly flat surface adding clean simple lines to your kitchen.

The slats are manufactured from toughened safety glass which can withstand the high loads associated with the everyday stresses of the modern kitchen and do not scratch. The material is also easy to care for and clean – the same applies to the real aluminium frame profiles that round off the high-quality look.

The innovative cassette design ensures consistent smooth running, and as it's made by REHAU, not only is it durable, but also very easily installed.

Available in either Satinato (pictured), high gloss White or Black. Available in standard dimensions for the kitchen industry.
