

### METALLIC LINE

Tailor made  
innovative  
designs...

Bring a touch of exclusivity to your kitchen with the Metallic-Line tambour door system. The sleek metallic surface finish gives kitchens the kind of high-quality, exclusive look traditionally only achieved with solid aluminium shutters. But there is more to the system than just good looks –Metallic-Line also excels in function, with benefits such as: quiet, smooth running tracks, improved ease of operation and installation due to Waivis' UK specific cassette system.

The Metallic-Line system brings high quality design and function to the kitchen. We can offer customers the exclusive stainless steel or aluminium look in either traditional 25 mm tambour door slats, or a modern, wider, 50 mm tambour door slat. With matching slam rails, running tracks and pelmets, we can cater for virtually all requirements, however diverse they might be! As well as standard kitchen cabinet sizes, Waivis can tailor make your shutter to your particular application.
