designs...

PVC or PP shutters are an excellent solution for storage in educational establishments due to their secure nature and space saving properties. The shutters can be specified to bring colour to the classroom and could even be branded with the school's logo or emblem.

Being able to lock away confidential student information as well as classroom supplies are important factors when choosing storage solutions in this type of environment. The Waivis shutter system are chosen by many of the large furniture manufacturers due to their robust and hardwearing durability.
