designs...

Medical equipment can be expensive as well as hazardous, so it is of vital importance that it can be kept under lock and key!

Waivis, alongside its partners, have developed a range of tambours suitable for the medical industry. Ranging from static vertical units for storing general supplies, to mobile units containing patients medication, allowing medical staff to keep equipment safe whilst on the go.

The lightweight PVC & PP tambours allow the carts to remain easy to manoeuvre, and the added benefit of not having a swing door means that corridors and walkways remain free from obstruction when the carts are in use.

The Waivis tambour units can also be fitted with a choice of locks, so unattended trolleys and cupboards can be left securely.
