A recent introduction to Waivis' product offering is the possibility to print across the whole surface of the shutter. Using state of the art digital printing techniques, Waivis can print your chosen image, company logo or slogan onto the shutter front.

This opens up a wealth of opportunity for companies to promote and personalise their storage units. Whether it's a reception area in a bank or office, or point of sale in a major supermarket, customers have come to rely on Waivis' bespoke service to add design and creativity to their everyday shutter requirements.

This printing process can be applied to PVC or aluminium shutters and is in addition to Waivis' standard range of decors and finishes. Just send us a .jpeg of your chosen image and we'll do the rest.
